A fresh and friendly way to cheer

Durable, easy-care and attractive: reactive resin floors from Silikal

Afraid of the dentist? Not any more! Not with the latest in gentle treatment methods and certainly not in such a modern, bright and cheery practice as the one headed by Dr. Sybille Strohecker, Dentist for Orthodontics in Offenbach, Germany. Here the patient is king and can feel good all around. In this recently renovated practice, clear, bright colours and a refreshing transparency makes a visit to the orthodontist much easier to get through.

And a little tender loving care was also given to the very basis of it all: the state-of-the-art, seam-

less reactive resin flooring system from Silikal. The floor coating with millimetre-sized coloured flakes in green, yellow and white which are strewn into the resin underscores the carefree mood the dental office was intended to convey.

The large selection of colours Silikal systems offer enables designers to match the floor perfectly with the optical design of the entire space. The treatment areas, waiting room, reception area, the stairwell and corridor were all given a covering made of MMA (methyl-methacrylate) resin.

Silikal hold up under all the loads of daily work in a dental practice

Proven in the field
For over 55 years
On many million m²

Especially important for the smooth daily operation of a dental practice is the excellent durability of such a flooring system. Dr. Strohecker says, "The floor has to hold up under a whole range of difficult conditions, among them the constant rolling of our chairs back and forth across the floor." The even surfaces make all this rolling both trouble-free and even pleasurable. The comings-and-goings of so many patients leave as few traces on the floor as the smaller "accidents" in the lab where specialists work with plastics for making braces. Even if some of them do fall on the floor there are no long-term

consequences to fear because Silikal floors, which by the way can usually be put down quickly and without any interruption to daily operations, are extremely resistant to many alkalis, greases, salts, acids, tinctures and solutions of various kinds.

The decisive arguments for the flooring system are, however, the hygiene aspects it offers. The seamless surfaces are easy to clean thoroughly. Moisture and spills can be removed completely from the floor without any residues left behind. Even harsh disinfectants cannot hurt a Silikal floor.

Project Data

Object:

Orthodontist practice
Dr. Sybille Strohecker,
Kaiserstr. 29,
63065 Offenbach, Germany

Areas covered:

Waiting room, treatment rooms,
corridors, reception area, hallways
and stairs, a total of approx. 150 m²

Material:

Silikal reactive resin, primed with R 51,
R 61 as load-bearing coat, coloured
flake floor in green-yellow-white,
sealed with non-pigmented R 71.

**Your call—Silikal!
An overview of the advantages.**

Hygienic and clean ...

- Monolithic, seamless surface
- Resistant to alkalis, acids, greases, oils, salts and other aggressive media
- Easy to take care of

Safe ...

- Anti-skid surface grades
- Wear and tear resistant
- Can withstand hot and cold

Quick and beautiful ...

- Extremely short curing times; no interruptions in business when renovations are made!
- Easy to lay, even at temperatures below zero
- Selection of appealing colours, e. g. with coloured quartz sand or flakes mixtures as standard

Silikal production and administration in Mainhausen, near Frankfurt/Main, Germany.
